TECNOLOGIA, SEMPLICITÀ ED EMOZIONE
IN UN SEMPLICE TOCCO.

THE NEW FRONTIER OF THE ONBOARD DOMOTIC SYSTEM.

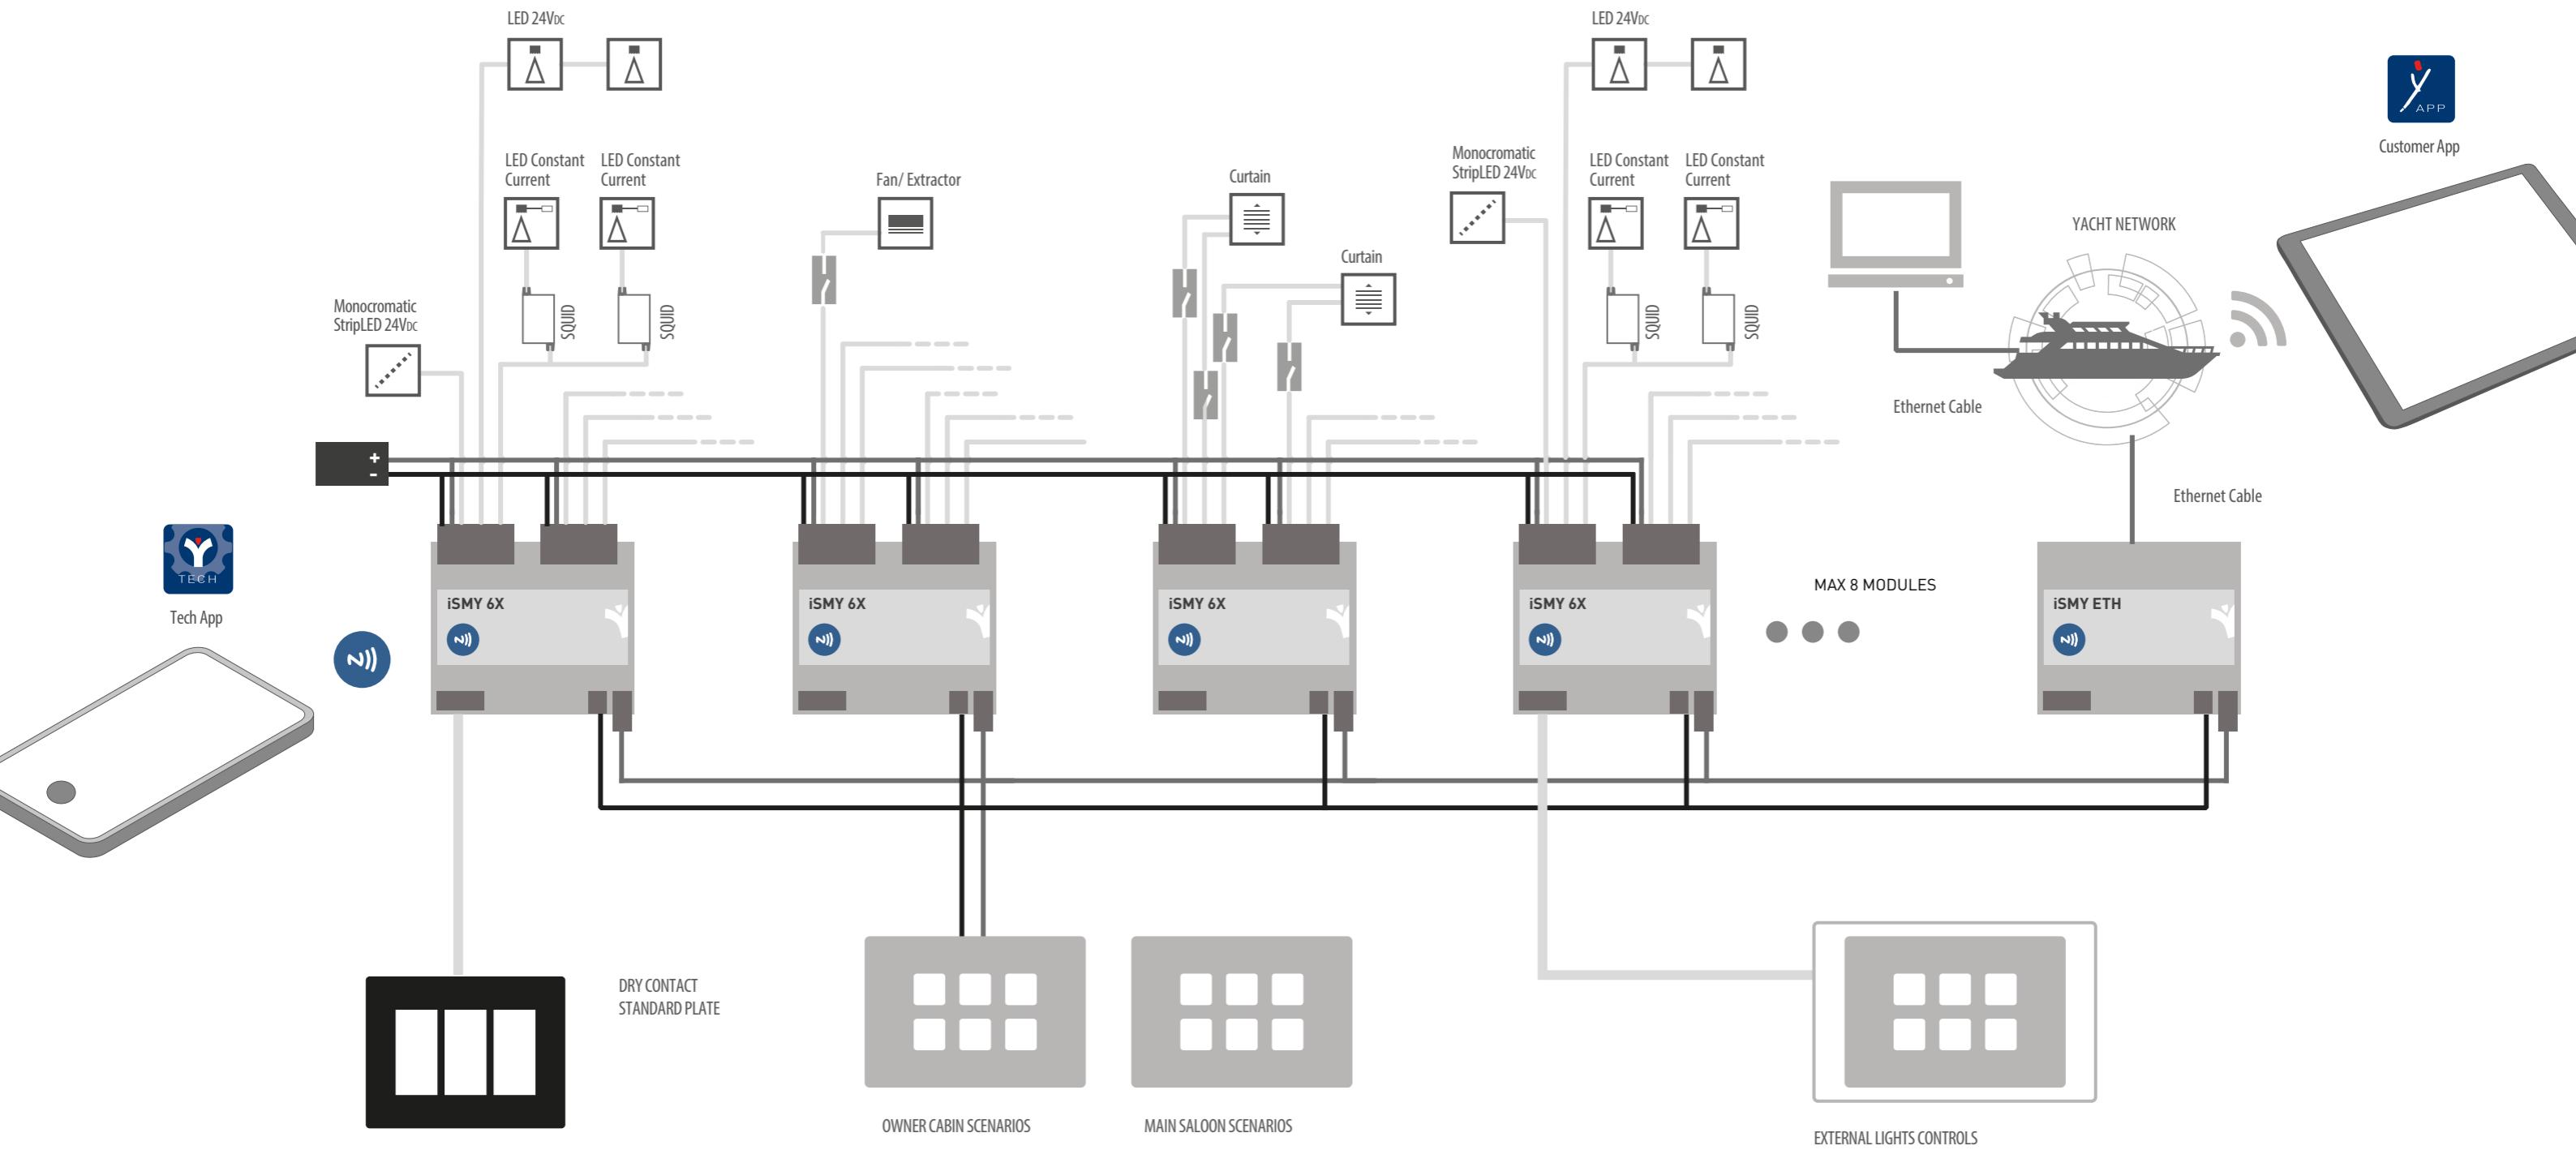

From the experience of Yachtica® comes iSMY, the first lighting control module for yacht with fully programmable multi-function outputs.

It is through iSMY possible to build a system that meets all the needs of lighting control and handling management of cabins and rooms on board the yachts.

The specific use and management of the APP make it a unique, versatile and innovative product.

LA NUOVA FRONTIERA
DELL'IMPIANTO
DOMOTICO DI BORDO.

Dall'esperienza Yachtica® nasce iSMY, il primo modulo domotico per la nautica con le uscite multifunzione completamente programmabile. Tramite iSMY è possibile realizzare un sistema che soddisfa tutte le esigenze di controllo illuminazione e gestione movimentazioni di cabine e locali a bordo di yacht. APP specifiche di utilizzo e gestione lo rendono un prodotto unico, versatile e innovativo.

iSMY 6XP

Made for
MARINE
Environment

CE

Smart Module

- 6 outputs: on/off, dimmer (on positive), curtains
- 8 programmable dry contact inputs
- NFC Antenna to set by the App iSMY TECH the outputs
- EasyBUS communication
- Up to 10 modules network
- Stand-alone mode
- Programmable functionality via Cabot
- Advanced managing of overload and short circuit
- Optoisolation between electronic and power
- DIN rail installation (6M)
- Detachable terminal blocks
- Formal coating treatment

Description

iSMY 6XP module is equipped with an integrated programmable microcontroller used to control and dimm 6 different 24Vdc lighting sources. Its main feature is that each output can be set, by the use of the Android App Yachtica® iSMY TECH (by a NFC antenna) as on/off, dimmer (on positive) or curtains (up/down with a couple of relays).

The module is rated to work with voltage driven monochromatic LEDs (with or without driver added) or with a PWM signal (if 3-wires driver provided). Each channel handles up to 5A loads.

Technical Data

Electronic power supply	18-32Vdc
Max. electronic requirements	0,6W (25mA@24Vdc, 18-32Vdc)
Outputs power supply	18-32Vdc
Load ratings	5A each, PWM 200Hz
Dimensions (W x H x D)	106x58x90mm (6 M)

Ethernet Communication Interface

- Ethernet interface
- EasyBUS communication
- DIN rail installation (6M)
- Detachable terminal blocks
- Formal coating treatment

Description

The ICB ETH is a module used to connect the Yachtica® system BUS EasyBUS to other devices/computer through their Ethernet port. The module is required combined with the USER APP and can also be used to program Yachtica®'s modules connected to the BUS, with custom functionalities through the Yachtica® software Cabot. The module is also used as communication interface between monitoring and/or entertainment systems and Yachtica®: the protocol optimizes transmission of control commands coming from different touch screen remotes.

Technical Data

Electronic power supply	11-32Vdc
Max. electronic requirements	0,8W (32mA @24Vdc, 64mA @12Vdc)
Link	RJ45 Ethernet
Dimensions (W x H x D)	106x58x90mm (6 M)

Download
Datasheet

The modules are managed by **two specific usage and management apps** that make it a unique, versatile and innovative product.

TECH APP

Simple and intuitive

Access to the programming of the outputs which can be directly modified without affecting the wiring, for the control and management of the lighting and automation system with attractive graphics and intuitive.

USER APP

For owners

For the control and management of the lighting and automation system with attractive graphics and intuitive.

I moduli sono gestiti da due app specifiche di utilizzo e gestione lo rendono un prodotto unico, versatile e innovativo.
TECH APP - Semplice e intuitiva. Si accede direttamente alla programmazione delle uscite che possono essere modificate senza intervenire sui cablaggi fisici.

USER APP - Per gli armatori. Per il controllo e la gestione dell'impianto domotico con grafiche accattivanti e intuitive.
